

How to check the status of outgoing faxes when using the ASDS FaxManager provider.

Category: Product Support -> FaxAdmin -> FaxAdmin 2008

Situation

You have sent faxes and would like to see which faxes have failed and which ones have been sent successfully.

Solution

You can check the status of outgoing faxes by using the ASDS Fax Manager. To access the ASDS Fax Manager, go to the **FaxAdmin** menu and choose **ASDS Fax Manager**. From here, you can see what faxes are still pending, which faxes have been sent, as well as which faxes have failed. You can even re-send a fax by right clicking it from the failed list and choose "Resend Fax".
